

Corporate Financial Intelligence **Dashboard**

Financial Performance Analysis of Tesla, Ford, and General Motors using Power BI

Prepared By:

Saransundaram Saravanasundaram

Tools Used:

Microsoft Power BI, Power Query, DAX

Date:

August 2026

Introduction

Project Title

Corporate Financial Intelligence Dashboard

Objective

The objective of this project is to Analyse and compare the financial performance of Tesla, Ford, and General Motors using Microsoft Power BI. The dashboard provides insights into revenue, profitability, liquidity, assets, equity, and cash flow performance.

Dataset Description

The project uses financial statement data from:

- Income Statement
- Balance Sheet
- Cash Flow Statement

Companies analysed:

- Tesla
- Ford
- General Motors (GM)

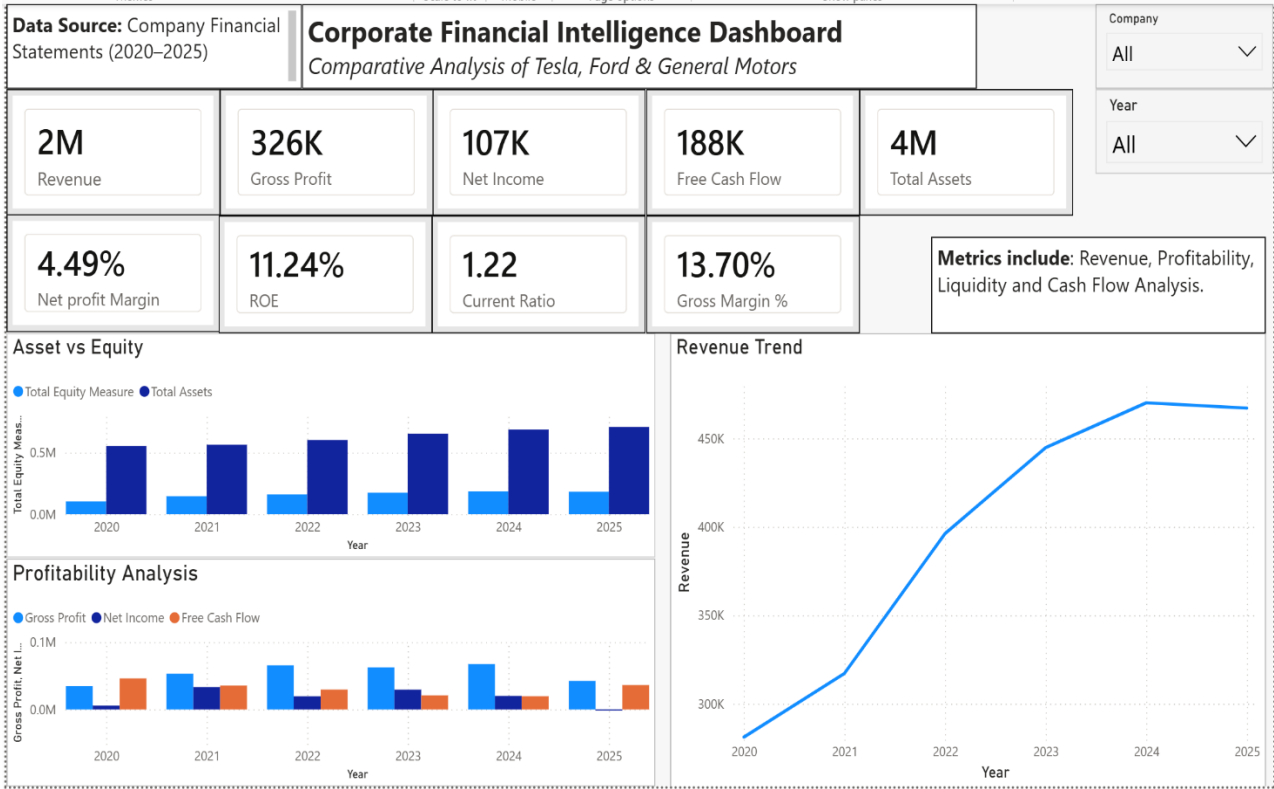

Period Covered:

- 2020 – 2025

Tools and Technologies

Tool	Purpose
Power BI	Dashboard Development
Power Query	Data Transformation
DAX	Calculations and Measures
Excel	Data Source

Executive Overview Dashboard

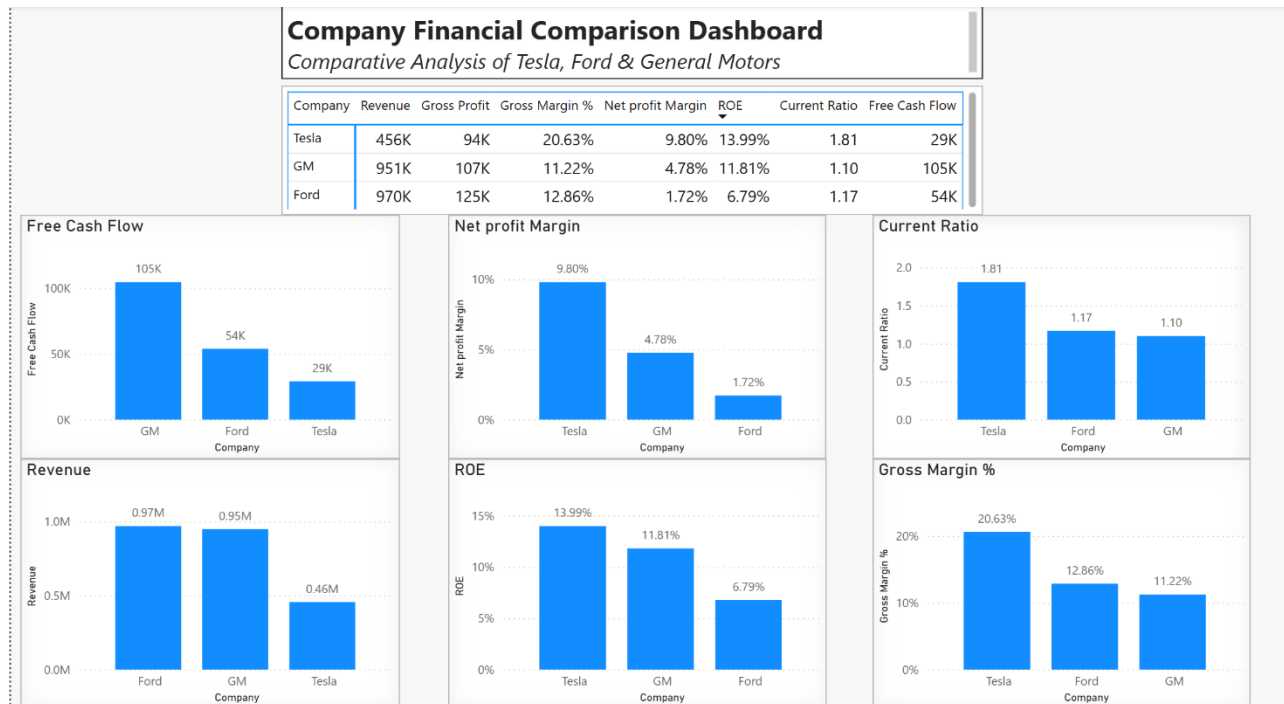

Description

The Executive Overview dashboard presents key financial indicators including Revenue, Gross Profit, Net Income, Free Cash Flow, Total Assets, ROE, Gross Margin %, Net Profit Margin %, and Current Ratio. Interactive slicers allow users to filter data by Company and Year.

Key Insights

- Total Revenue reached approximately **2 million**.
- Total Assets exceeded **4 million**, indicating strong asset growth.
- ROE and Gross Margin metrics provide a quick overview of profitability.
- Revenue trend shows consistent growth over the selected period.

Company Comparison Dashboard

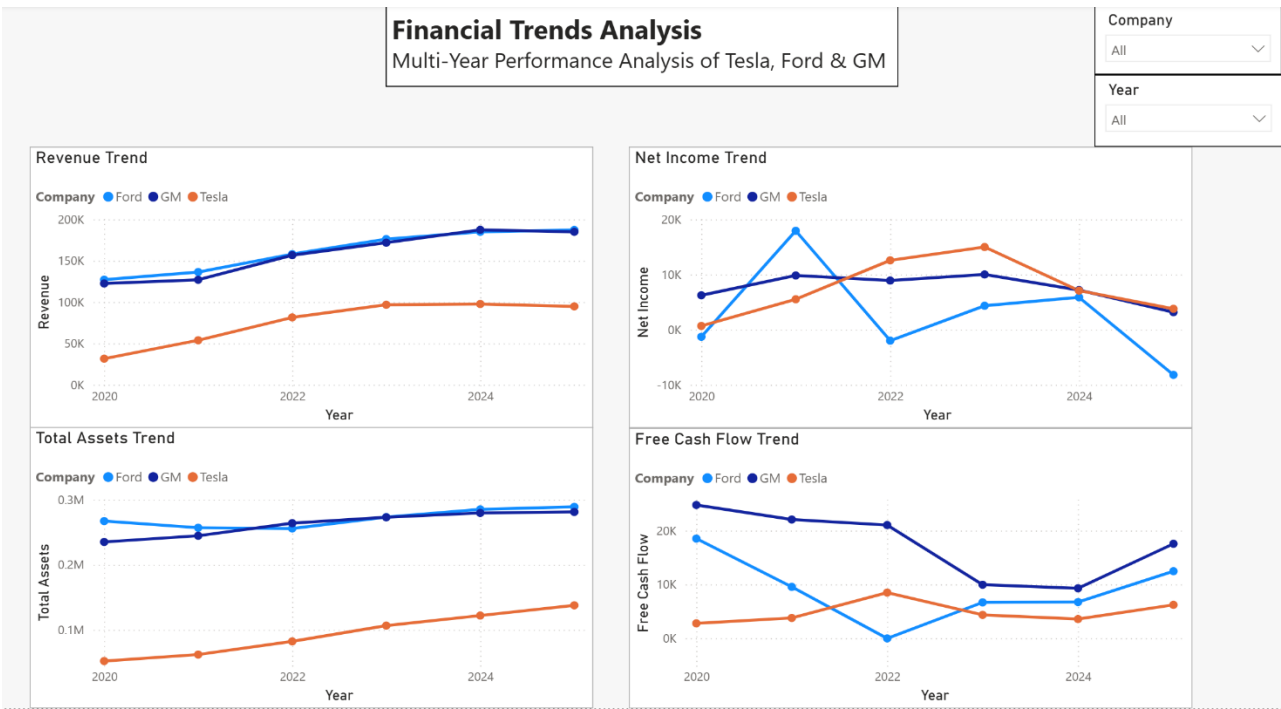

Description

This dashboard compares the financial performance of Tesla, Ford, and General Motors using a combination of tables and bar charts.

Key Insights

- GM recorded the highest Free Cash Flow.
- Tesla achieved the highest Net Profit Margin.
- Tesla also demonstrated the strongest ROE.
- Ford generated the highest Revenue among the three companies.

Financial Trends Analysis Dashboard

Description

The Financial Trends Analysis dashboard displays year-over-year changes in Revenue, Net Income, Total Assets, and Free Cash Flow for Tesla, Ford, and GM.

Key Insights

- Revenue increased steadily for all companies over the analysis period.
- Tesla showed significant growth in Net Income during certain years.
- Total Assets increased consistently across the companies.
- Free Cash Flow fluctuated over time, highlighting changes in operational performance.

Conclusion

The Corporate Financial Intelligence Dashboard successfully Analyses and compares the financial performance of Tesla, Ford, and General Motors. By leveraging Power BI, Power Query, and DAX, the project transforms raw financial data into interactive visualizations and actionable insights. The dashboard enables users to evaluate profitability, liquidity, operational efficiency, and long-term trends, supporting informed business decision-making.
